April 29th '13.

The Private Secretary
To His Highness the Maharaja of Mysore,
Bangalore.

Dear Sir,

Seeing from the papers that plague is just now so prevalen may I call your attention to the value of Tincture of Iodine as a remedy. We have been using it in different parts of India amongst our own people with remarkable success during the past two years. I need only mention two cases as an illustration of others.

1. An English qualified nurse who was in charge of our dispensary at Chawa Pail, Ludhiana District, Panjab, recently treated 51 cases of plague, with the result that 50 recovered.

2. One of our Officers, who is a dispenser, in charge of one of our Institutions in the U.P. has just treated 60 cases and of these 56 recovered.

The treatment is as follows,-

> "One drop of Tincture of Iodine in a little water every two hours to be taken internally; and the buboes to be painted with Iodine constantly throughout the day."

I am not aware that the remedy has yet received an official trial, but it seems to me that it is much to be desired, and hence I venture to call the attention of His Highness to the matter.

Yours truly,

J. Booth Tucker

May 21st

The Private Secretary
To His Highness the Maharaja of Mysore,
Bangalore.

Dear Sir,

With reference to m previous letter re treatment of Plague with Iodine, I find tht the figures given in my previous letter regarding Rura U.P. was incorrect and that 54 cases were treated with Iodine instead of 60, as previous represented. These were all cases of Bubonic Plague and all recovered.

The rest of the cases were of Pneumonic Plague and were treated with other remedies.

Yours truly,

F. Booth Tucker
